

**LIST OF GOODS REFERRED TO IN ARTICLE XXX**

**VALUATION OF CERTAIN PERISHABLE GOODS IMPORTED ON  
CONSIGNMENT IN ACCORDANCE WITH ARTICLE 74 (2) (c) OF THE CODE**

1. The following table shows the list of products and the respective periods for which the Commission will make available a Unit price to be used as the basis for the determination of the customs value of whole fruit and vegetables, of a single kind, imported on consignment only. In such a case, the customs declaration is definitive, as far as the determination of the customs value is concerned.
2. For the purpose of determining the customs value of products referred to in the present annex and imported on consignment, a unit price per 100 Kg net is established for each product. Such price is considered representative with respect to the importation of such products in the Union.
3. The unit prices are used to determine the customs value of the imported goods for periods of 14 days, each period beginning on a Friday. The reference period for determining the unit prices is the preceding period of 14 days ending on the Thursday preceding the week during which new unit prices are to be established. In particular circumstances, the Commission may decide to extend the period of validity period for further 14 days. Member States will be promptly informed of such decision.
4. The unit prices which the Member states supply to the Commission shall be calculated on the basis of the gross proceeds of sales recorded at the first commercial level after importation, and deducting the following elements from these figures:
  - a marketing margin for the marketing centres;
  - the costs of transport, insurance and associated costs within the customs territory;
  - import duties and other charges which are not to be included in the customs value.

The Unit prices will be notified in Euro. If applicable, the rate of conversion to be used is that specified in Article ....

5. Member States may fix standard amounts for deduction in respect of transport, insurance and associated costs in accordance with point 4. Such standard amounts and the methods for calculating them shall be made known to the Commission.
6. The prices are notified to the Commission (DG TAXUD) not later 12 noon on the Monday during the week in which the unit prices are made available. If that day is a non-working day, the notification will take place on the working day immediately preceding that day. The communication to the Commission will include also the indication of the approximate quantities of product on which the unit prices were calculated.

7. Following receipt of the unit prices by the Commission, these figures are reviewed and subsequently disseminated via TARIC. Unit prices only apply if they are disseminated by the Commission.
8. The Commission may decide not to accept, and consequently not to disseminate, the unit prices for one or more products where these prices would be significantly different in relation to the previous published prices, taking in particular account factors such as quantity and seasonality. Where necessary, the Commission will make enquiries with the relevant customs authorities to solve such cases.
9. To assist this process, Member States shall supply annual import statistics, for the products listed in the following table before 30 September in the current year, with reference to the preceding year. These statistics will concern the total imported quantities of each products, and will also indicate the proportion of products imported on consignment.
10. Based on such statistics, the Commission will establish which Member States will be in charge of notifying Unit prices for each product for the following year, informing them by 30 November at the latest.

**LIST OF GOODS REFERRED TO IN ARTICLE XXX<sup>1</sup>**

<b>CN (TARIC) Code</b>	<b>Description of Goods</b>	<b>Period of validity</b>
0701 90 50	New potatoes	1.1 to 30.6.
