<b>1. Introduction</b>	

## **1. Introduction**

This document presents the overall Data Group structure of the messages supported for NCTS P5. The Data Groups are shown in a hierarchical format, where lower level data groups are indented with hyphens. The MESSAGE Data Group is the only Data Group at the top level and it is the only Data Group that appears without a hyphen in front of it since it comprises of all other Data Groups in a message. A three-letter code is shown inside a parenthesis next to each data group. This is a code to uniquely identify a data group.

### **DDNA RFC-List Alignment**

The specific Appendix is aligned to DDNTA RFC-List.36
