## **INTRODUCTORY NOTES AND LIST OF SUBSTANTIAL PROCESSING OR WORKING OPERATIONS CONFERRING ORIGINATING STATUS TO MANUFACTURED PRODUCTS**

### **INTRODUCTORY NOTES**

#### **1. Definitions**

1.1 References to "manufacturing", "producing" or "processing" goods include any kind of working, assembly or processing operation.

Methods of obtaining goods include manufacturing, producing, processing, raising, growing, breeding, mining, extracting, harvesting, fishing, trapping, gathering, collecting, hunting and capturing.

1.2 "Material" includes ingredients, parts, components, subassemblies and goods that were physically incorporated into another good or were subject to a process in the production of another good.

"Originating material" means a material whose country of origin, as determined under these rules, is the same country as the country in which the material is used in production.

"Non-originating material" means a material whose country of origin, as determined under these rules, is not the same country as the country in which that material is used in production.

"Product" means the product being manufactured, even if it is intended for later use in another manufacturing operation.

1.3 Value added rule

a) "X% value added rule" means manufacture where the increase in value acquired as a result of working and processing, and if applicable, the incorporation of parts originating in the country of manufacture represents at least X% of the ex-works price of the product. "X" represents the percentage indicated for each heading.

b) "Value acquired as a result of working and processing and incorporation of parts originating in the country of manufacture" means the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations.

1.4 Complete making up

The term 'complete making-up' used in the list means that all the operations following cutting of the fabric or knitting or crocheting of the fabric directly to shape have to be performed. However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

— fitting of buttons and/or other types of fastenings,

- making of button-holes,
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses,
- fitting of trimmings and accessories such as pockets, labels, badges, etc.,
- ironing and other preparations of garments for sale ‘ready made’.

It is possible that in particular manufacturing operations, the accomplishment of finishing operations, especially in the case of a combination of operations, is of such importance that these operations must be considered as going beyond simple finishing.

In these particular cases, the non-accomplishing of finishing operations will deprive the making-up of its complete nature.

## **2. Application of the rules in this Annex**

2.1 The rules provided in this Annex are to be applied to goods based upon their classification in the Harmonised System and any additional subdivisions created for the purposes of this Annex (hereinafter referred to as "split heading" or "split subheading").

"Harmonised System" means the Harmonized Commodity Description and Coding System (also referred to as "HS") as amended pursuant to the Recommendations of 26 June 2009 and of 26 June 2010 of the Customs Cooperation Council.

Classification of goods within headings and subheadings of the Harmonised System is governed by the General Interpretative Rules and any relative Section, Chapter and Subheading Notes to that System. Classification of goods within any split heading or subheading shall also be governed by the General Interpretative Rules and any relative Section, Chapter and Subheading Notes to the Harmonised System, unless the rules of this Annex otherwise require.

2.2 Reference to a change in tariff classification in primary rules shall apply only to non-originating materials.

2.3 Materials which have acquired originating status in a country are considered to be originating materials of that country for the purpose of determining the origin of a good incorporating such materials, or of a good made from such materials by further working or processing in that country.

2.4 When it is not commercially practical to keep separate stocks of interchangeable materials or goods originating in different countries, the country of origin of commingled materials or goods that are interchangeable may be allocated on the basis of an inventory management method recognized in the country in which the materials or goods were commingled.

2.5 For the purposes of the application of primary rules based on tariff classification change, non-originating materials that do not satisfy the primary rule shall, unless otherwise

specified in a certain Chapter, be disregarded, provided that the total value of such materials does not exceed 10% of the ex-works price of the good.

2.6 Chapter Primary Rules have the same value as the Primary Rule at subdivision level and can be applied alternatively

### **3. Glossary**

The Primary Rules at subdivision level, when they are based on a change in tariff classification, can be expressed using the following abbreviations.

- CC** - change to the chapter in question from any other chapter
- CTH** - change to the heading in question from any other heading
- CTSH** - change to the subheading in question from any other subheading or from any other heading
- CTHS** - change to the split heading in question from any other split of this heading or from any other heading
- CTSHS** - change to the split subheading in question from any other split of this subheading or from any other subheading or heading

REFERRED TO IN [Art DA-II-2-02]**

CHAPTER 2

**Chapter residual rule applicable to mixtures:**

1. For the purposes of this residual rule, "mixing" means the deliberate and proportionally controlled operation consisting in bringing together two or more fungible materials.
2. The origin of a mixture of products of this Chapter shall be the country of origin of the materials that account for more than 50% by weight of the mixture. The weight of materials of the same origin shall be taken together.
3. When none of the materials used meet the percentage required, the origin of the mixture shall be the country in which the mixing was carried out.

**Chapter notes:**

1. Where the primary rule for headings 02.01 until 02.06 is not met, the meat (offal) shall be considered as originating in the country where the animals from which they were obtained were fattened or reared for the longest period.
2. The criterion to determine the major portion of the materials as set forth in Article [DA-II-2-02 (2)(c)] for this Chapter is weight.

## CHAPTER 20

### Chapter residual rule applicable to mixtures

1. For the purposes of this residual rule, "mixing" means the deliberate and proportionally controlled operation consisting in bringing together two or more fungible materials.
2. The origin of a mixture of products of heading 20.09 (fruit juices (including grape must) and vegetable juices, unfermented, whether or not containing added sugar or other sweetening matter) shall be the country of origin of the materials that account for more than 50% by weight of dry matter of the mixture. The weight of materials of the same origin shall be taken together.
3. When none of the materials used meet the percentage required, the origin of the mixture shall be the country in which the mixing was carried out.

### Chapter note:

The criterion to determine the major portion of the materials as set forth in Article [DA-II-2-02 (2)(c)] for this Chapter is weight.

CHAPTER 72

**Iron and steel**

Definition

**For the purposes of this Chapter, the expressions "cold-rolled (cold-reduced)" and "cold-formed" mean cold reduction resulting in changes to the crystalline structure of the workpiece. The expressions do not**

include very light cold-rolling and cold-forming processes (skin pass or pinch pass) which act only on the surface of the material and do not result in change to its crystalline structure.

#### Chapter Note

For the purposes of this Chapter, a change of classification resulting only from cutting is not to be considered as origin-conferring.

Primary Rule: Goods or parts produced from blanks

- (a) **The country of origin of a good or part produced from a blank which by application of the Harmonized System General Interpretative Rule 2(a) is classified in the same heading, subheading or subdivision as the complete or finished good or part, shall be the country in which every working edge, working surface and working part was configured**

to final shape and dimension, provided, in its imported condition, the blank from which it was produced:

- (i) was not capable of functioning, and
- (ii) was not advanced beyond the initial stamping process or any processing required to remove the material from the forging platter or casting mould;

(b) If the criteria in paragraph (a) are not satisfied, the country of origin is the country of origin of the blank of this Chapter.

## Chapter 84

### **Primary Rule: Parts and accessories produced from blanks:**

1. The country of origin of goods that are produced from blanks which by application of the HS General Interpretative Rule 2(a), are classified in the same heading, subheading or subdivision as the complete or finished goods, shall be the country in which the blank was finished provided finishing included configuring to final shape by the removal of material (other than merely by honing or polishing or both), or by forming processes such as bending, hammering, pressing or stamping.

2. Paragraph 1 above applies to goods classifiable in provisions for parts or parts and accessories, including goods specifically named under such provisions.

### **Definition of 'Assembly of semiconductor products' for the purpose of heading 84.73**

'Assembly of semiconductor products' means a change from chips, dice or other semiconductor products to chips, dice or other semiconductor products that are packaged or mounted onto a common medium for connection or connected and then mounted

## Chapter Notes

**Note 1: Collection of parts:**

Where a change in classification results from the application of HS General Interpretative Rule 2(a) with respect to collections of parts that are presented as unassembled articles of another heading or subheading the individual parts shall retain their origin prior to such collection

**Note 2: Assembly of the collection of parts:**

Goods assembled from a collection of parts classified as the assembled good by application of General Interpretative Rule 2 shall have origin in the country of assembly, provided the assembly would have satisfied the primary rule for the good had each of the parts been presented separately and not as a collection

**Note 3: Disassembly of goods:**

A change of classification which results from the disassembly of goods shall not be considered as the change required by the rule set forth in the table of "list rules". The country of origin of the parts recovered from the goods shall be the country where the parts are recovered, unless the importer, exporter or any person with a justifiable cause to determine the origin of parts demonstrates another country of origin on the basis of verifiable evidence.

## Chapter 85

### **Primary Rule: Parts and accessories produced from blanks:**

1. The country of origin of goods that are produced from blanks which by application of the HS General Interpretative Rule 2(a) are classified in the same heading, subheading or subdivision as the complete or finished goods, shall be the country in which the blank was finished provided finishing included configuring to final shape by the removal of material (other than merely by honing or polishing or both), or by forming processes such as bending, hammering, pressing or stamping.
2. Paragraph 1 above applies to goods classifiable in provisions for parts or parts and accessories, including goods specifically named under such provisions.

### **Definition of ‘assembly of semiconductor products’ for the purposes of headings 85.35, 85.36, 85.37, 85.41 and 85.42**

‘Assembly of semiconductor products’ means a change from chips, dice or other semiconductor products to chips, dice or other semiconductor products that are packaged or mounted onto a common medium for connection or connected and then mounted

## Chapter Notes

### **Note 1: Collection of parts:**

Where a change in classification results from the application of HS General Interpretative Rule 2(a) with respect to collections of parts that are presented as unassembled articles of another heading or subheading the individual parts shall retain their origin prior to such collection.

### **Note 2: Assembly of the collection of parts:**

Goods assembled from a collection of parts classified as the assembled good by application of General Interpretative Rule 2 shall have origin in the country of assembly, provided the assembly would have satisfied the primary rule for the good had each of the parts been presented separately and not as a collection.

### **Note 3: Disassembly of goods:**

A change of classification which results from the disassembly of goods shall not be considered as the change required by the rule set forth in the table of "list rules". The country of origin of the parts recovered from the goods shall be the country where the parts are recovered, unless the importer, exporter or any person with a justifiable cause to determine the origin of parts demonstrates another country of origin on the basis of verifiable evidence such as origin marks on the part itself or documents.
